PROFILE SUMMARY:

A dynamic, self-motivated graduate student with strong analytical and organizational skills, excellent communication and intercultural skills, and a team player eager to work in a fast-paced, inter-disciplinary environment. Academically exposed to core networking concepts like IP, Routing and Switching, Cloud Computing, Network Functions Virtualization, and Software Defined Networks, and substantially experienced in the field of computer networks, with exposure to networking technologies like 4G, LTE and WiMAX.

EDUCATION

Ph.D. in Computer Engineering

GPA: 4.33/4.00

University of New Mexico, Albuquerque NM.

2020 – 2023

Relevant Coursework: Computer Networks, Network Economics, Computing and Algorithms, Hardware Software Codesign with FPGAs

Bachelor of Science in Electrical and Electronics Engineering

GPA: 4.05/5.00

University of Lagos, Nigeria.

2012- 2016

WORK EXPERIENCE

Graduate Research and Teaching Assistant

Electrical and Computer Engineering Department, University of New Mexico

Jan 2020 - Present

- Conduct research on resource allocation and optimization in heterogeneous wireless networks, artificial intelligence, and demand response management in smart grid networks using Game Theory, Contract Theory and Reinforcement Learning.
- Assist with course preparation, office hours tutoring and grading of students in Programming Fundamentals in C, Introduction to Communication Systems, and Advanced Engineering Mathematics with MATLAB.

Digital Strategist (Team Lead)

TERAWORK, Nigeria

Oct 2017 - Nov 2019

- Led the development and execution of digital strategies and new business executions that drove rapid growth.
- Improved the usability, design, content, and web traffic of the company website.

Network Engineer

Government Secondary School, Nigeria

Aug 2017 - Oct 2017

- Managed a VSAT Network for 24th Gen. Network Company and assisted with troubleshooting and maintenance.

Network Engineer (Intern)

Cyberspace Network Limited, Nigeria

Aug 2015 - Jan 2016

- Installed, Configured, and troubleshooted several network devices (LTE, WiMAX, VSAT).
- Managed Base stations and other network infrastructures, and assisted site engineers with network issues resolution from the Network Operations Centre (NOC).

TECHNICAL PROFICIENCY

- C, C++, MATLAB, Python, LTE, WiMAX, IP Telephony, Routing and Switching, HTML, CSS, WordPress, Microsoft Office, NetSim, PowerWorld, Proteus, Multisim, Arduino, VHDL, FPGAs, Optimization.

GRADUATE RESEARCH EXPERIENCE

- Contract-theoretic Crowdsourcing using Social IOT. July 2020 – Present
- Contract-theoretic Demand Response Management in Smart Grid Systems. May 2020 - Aug 2017
- Network Economics for Smart Grid Communications. Feb 2020 - May 2020

UNDERGRADUATE PROJECTS AND RESEARCH

- The Design and Construction of An SMS Controlled Vehicle Antitheft System. 2016
- Remotely Controlled Home Automation System Using the Internet. 2016

MEMBERSHIPS AND OFFICES HELD

- National Society of Black Engineers (NSBE), UNM - **Treasurer** Jan 2020 – Present
- Black Students Association - **Member** Aug 2020 – Present
- Graduate and Professional Students Association (GPSA), UNM - **Grant Reader** Aug 2020 – Present
